

### **REMARKS**

Claim 1 was found objectionable because of the word “and” at the end of line 9. This has been corrected above.

Claim 19 was found objectionable because of a spelling error in line 7, i.e. “as decried”. This has been corrected above.

Claims 1-20 were rejected under 35 USC 102 based on Anuff et al. Applicants respectfully traverse this rejection based on the following. Claim 1 recites the step of forming a page address from the names of said database and said form. This is not taught or even suggested by Anuff et al. Rather, Anuff et al. disclose:

“Typically, each segment of information that can be accessed at once, e.g. file, is referred to as a web page, and has an associated network address. Thus, by entering a particular address in a browser application, the user is presented with one page of information that is stored at a particular server.” Column 3 lines 17-22.

Thus, Anuff et al. disclose use of a “particular address” to reference a web page, but do not disclose or even suggest that the address is formed from the names of the database and form as recited in claim 1. Therefore, the rejection under 35 USC 102 should be withdrawn.

Independent claims 6, 11 and 19 distinguish over Anuff et al. for the same reasons that independent claim 1 distinguishes thereover.

Claims 2-5, 21 depend on claim 1, claims 7-10, 22 depend on claim 6 and claims 12-18, 23 depend on claim 11, and therefore, distinguish over Anuff et al. for the same reasons as claim 1 distinguishes thereover.

In addition, new claim 21 which depends on claim 1 also recites that the configuration document includes a field for a content manager to specify a number of columns to present data on said page, and further comprising the step of the content manager specifying the number in

said field. (This is described in the Detailed Description on page 4 lines 6-10 and illustrated in Figures 2A and 6A.) This is not taught or even suggested by Anuff et al. and is an additional reason for allowance of claim 21. New claim 22 which depends on claim 6, and new claim 23 which depends on claim 11, similarly distinguish over Anuff et al.

In addition to the foregoing deficiencies of Anuff et al, Applicants submit the enclosed Rule 131 Declaration to swear behind the filing date of Anuff et al.

Based on the foregoing, Applicants request that the present patent application as amended above, be allowed.

Respectfully submitted,

Dated: Sept 1, 2005
